

CONNECT

Compliant Messaging Built for Casino Platforms

Trusted by Casino & Hospitality Technology Partners

Powering Leading Casinos & Resort Brands

Carrier-approved SMS, MMS, alerts, and automated messaging designed specifically for regulated gaming environments.

Deliver real-time player communication without managing carrier compliance, infrastructure, or messaging operations internally.

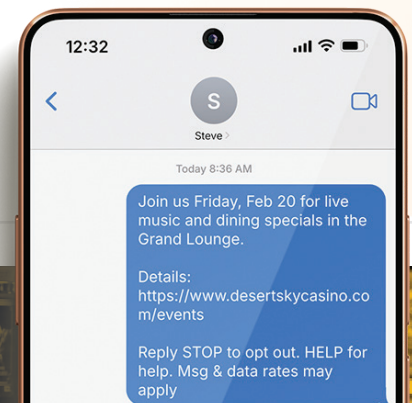

What It Does:

- AI-Powered Messaging
- SMS & digital message delivery
- Event-triggered notifications
- Loyalty lifecycle journeys
- Host & employee messaging
- Opt-in management

With APIs and integration hooks that connect directly to your platform.

With TechSol Connect Messaging, partners and operators can:

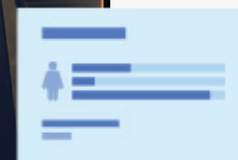

- Add compliant SMS & digital engagement to your platform
- Use **AI-assisted messaging** governance to help ensure communications stay compliant
- Offer white-labeled guest & player experiences
- Integrate with loyalty, PMS, CRM, and promotion systems
- Launch new revenue streams without building from scratch

The Messaging Journey

A casino operator launches a promotion:

1. Players receive a targeted SMS promotion
2. The message pulls real-time loyalty data
3. Players receive a personalized offer
4. Engagement is tracked automatically
5. Follow-up messaging triggers based on behavior

The result is higher engagement and smarter campaigns.

Two More Powerful Tools. One Connected Platform.

AI-Powered Messaging. Digital Event Passes. **Compliant Player Engagement.**

Events & Promotions Hub

Casino Event Tech, Ready to Go

Casino events are complex to manage, list, and promote digitally. Most partner platforms aren't built to support centralized event discovery, registrations, and guest communications.

TechSol's Events & Promotions Hub gives you a ready-made event system you can add to your platform, no extra development or operational headaches required.

Gamification Engine

Launch Digital Scratch-Offs in Days

Casino operators love promotions. Players love games of chance. Most platforms can't support either digitally or capture compliant opt-ins at scale.

TechSol's Gamification Engine lets partners launch scratch-off games, giveaways, and prize campaigns that are fully branded, fully integrated — and designed to drive compliant list growth from every interaction.

SOC 2
TYPE II
CERTIFIED

Tired of working with vendors that won't support casino traffic, or leave your team responsible for the risk?

SOC 2 Type II audited, TechSol Connect has completed an independent audit validating the policies, procedures, and operational controls we use to safeguard customer and end-user data.

Why This Matters to Partners:

- Meet carrier compliance requirements
- Support gaming-related messaging legally
- Keep audit trails & opt-in records
- Protect your brand from regulatory risks
